

Your complete service in arrays

- **DNA ARRAYS SERVICES** pangenomic or focused
(Human, Mouse, Rat, Cotton, Rice...)
 - Gene expression profiling
- **TISSUE ARRAYS** from normal and pathological cases
(up to 100 cases)
 - Protein profiling in tissues
- **CELL SIGNALING PATHWAY**
(up to 725 antibodies, including phosphorylated proteins)
 - Multiplex protein expression study
- **MULTIPLEX CYTOKINES DETECTION**
(up to 507 secreted proteins: Human, Mouse, Rat)
 - Cytokine profiling
- **HIGH DENSITY HUMAN PROTEIN ARRAY**
(up to 8 000 proteins)
 - Auto-antibody serum profiling for biomarkers identification, Protein-protein interactions
- **CUSTOM MADE ARRAYS**
 - Peptide array for epitope mapping, Bacterial antigen array for vaccine research, Antibody array for diagnostic...
- **BIO-INFORMATIC TOOLS** to manage and analyze your array data

Dedicated organisation

- **Specialized team** with several years of experience

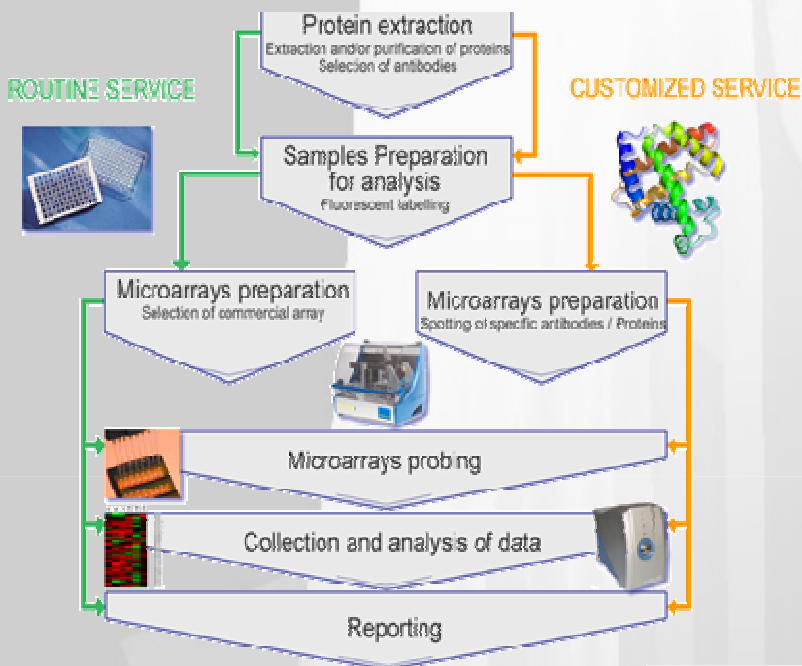

MicroBioChips

Dedicated to your success

➤ **More than 40 clients** projects **successfully** managed

From sample to analysis report, a turn-key solution adapted :

Clients reference :

Our commitment to Excellence

➤ Your Benefits:

- ✓ Time saving
- ✓ High quality results
- ✓ No equipment required
- ✓ Personalized project management

➤ Academics, Industry:

- ✓ Reinforce your Grant request
- ✓ Increase your impact factor
- ✓ Improve process flexibility
- ✓ Iso 9001 Certification
